Face Bricks

Bright reddish coloured face brick manufactured in standard brick dimensions. Mostly used for exterior walls and durawalls

Red Rustic

Light brownish face bricks for super structure. Very solid and weatherproof. Can be used for all exterior walls without the need to plaster.

Light Brindle

Bright coloured face brick that is manufactured in standard brick dimensions. Mostly used for exterior walls and durawalls

Brindle Smooth

Face bricks for super structure. Much more beautiful and attractive than bricks used for the interior walls. They are very solid and weatherproof.

Dark Brindle

A double size face brick for super structure. The length of the brick is twice its width and saves on bricklaying time.

Brindle Double

Multi-coloured face bricks that can be used without plaster. They can be used for durawalls and window cills. They have a rustic appearance

Multi-Special

Commons & Industrials

Mainly used for super structure without the need to be plastered. The standard ones come in regular brick dimensions. Can be used to build from the foundation going up.

Black Spotted

Clay bricks suitable for general building work that is to be plastered and are made with no special surface treatment.

Commons

An engineering brick manufactured to strict dimension and quality tolerances. A brick for foundations also known as a load bearing brick.

Industrials

A deformed overburnt brick. Can also be used as a face brick. Clinkers have a unique uneven finish that can be used creatively for unique aesthetics.

Clinker

These are double size common bricks suitable for general building work that is plastered and are made with no special surface treatment.

Common Double

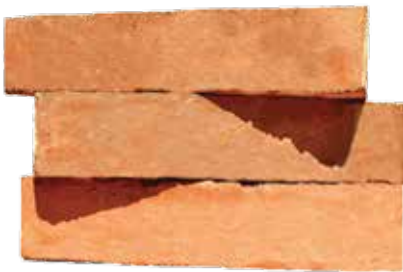

A double size engineering brick manufactured to strict dimensions. The length of the brick is twice its width and saves on bricklaying time. Can be used as a face brick and can be painted over.

Industrial Double

Bright reddish coloured face brick manufactured in standard brick dimensions. Mostly used for exterior walls and durawalls

Bullnose

Bright coloured face brick that is manufactured in standard brick dimensions. Mostly used for exterior walls and durawalls

Pavers

A double size face brick for super structure. The length of the brick is twice its width and saves on bricklaying time.
